3	Department of Animal Husbandry, Punjab	1887	574	54%	439 (76%)	135 (24%)	380%
4	Department of Animal Husbandry, Jammu & Kashmir	48	27	64%	23 (85%)	4 (15%)	700%
5	Group of Veterinary Experts and Farmers Switzerland	24	18	75%	15 (83%)	3 (17%)	700%

*Above data taken from government documents and other verifiable and published sources. Critical evaluation of some of above figures given in the book, "Super Science & Playing God".

** 3 Recent trials conducted by **Trinova Nutrition International** in France at mid sized farms has given results between 70% to 80%. The data compilation is in process.

Product information

- * Liquid form
- * Administration through oral route
- * Administration to be done before AI or after natural service.
- * Dose : 225 ml is sufficient for 450 to 500 kg body weight, for heavy animals adjust dose accordingly

Added Advantage

- * Un-affected conception rate
- * Congenitally compatible
- * Economically affordable
- * Easy transport and handling
